## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claims 4-6 and 11 is withdrawn in view of the newly discovered reference(s) to "controllably moving each support". Rejections based on the newly cited reference(s) follow.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-6 and 11 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,2,4-6 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Harwood (5,398,177).

5. Harwood the structural limitations of claims 1,2,4-6 and 11: providing a plurality of lights, each one of said lights for producing a light beam, providing a plurality of movable light supports (fig 1); mounting each one of said lights on a corresponding one of said supports (fig 2); defining a path to be traversed by said supports and said lights; and, controllably moving each one of said supports and said lights along said path at a selectably variable speed (abstract, col. 4 lines 10-44), independently of movement of any other one of said supports and said lights along said path, and while energizing said

Art Unit: 2875

lights to produce said light beams, controllably moving further comprises positioning each one of said supports at a selected location along said path (fig 1), said controllably moving further comprises moving said supports and said lights along said path in a selectably variable direction (figs 1 and 2), said controllably moving further comprises moving selected ones of said supports and said lights along said path (figs 1 and 2); said controllably moving further comprises moving selected ones of said supports and said lights along said path in a selectably variable direction (figs 1 and 2), controllably maintaining a selected distance between adjacent ones of said supports (figs 1 and 2).

***Allowable Subject Matter***

6. Claims 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 12-19 are allowed.

8. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not teach a combination of:

- A lighting method as defined in any one of claims 1, 2, 4, 5, or 6, further comprising controllably moving said lights with respect to said supports;
- A lighting method as defined in any one of claims 1, 2, 4, 5, or 6, further comprising controllably moving said lights with respect to said supports to aim said lights at a selected focal point.

Art Unit: 2875

- A lighting method as defined in any one of claims 1, 2, 4, 5, or 6, further comprising controllably moving said lights with respect to said supports to keep said lights aimed at a moving focal point;
- A lighting method as defined in any one of claims 1, 2, 4, 5, or 6, further comprising selectably varying the color of said light beams.
